## SUMMIT PLATEAU

It is essential to keep well back from the edge. Serious accidents can occur. This is especially important during high winds or when there is snow. Snow on the summit can make the landscape look different and there are often overhanging cornices that are ready to break away.

## NORTH EAST FACE

All around the summit there is steep dangerous ground such as the 611m (2000ft) cliffs on the NE face. Keep to the main route. When you leave the summit ensure you are returning by the correct path.

## FIVE FINGER GULLY

The top of the Five Finger Gully has a deceptive gentle slope which quickly leads to steep dangerous cliffs. Pay attention and ensure you are heading in the correct direction. Many accidents occur in this area.

## RED BURN

On your way up the path, when you reach the area near the lochan, make sure you follow the mountain track AND NOT THE PATH TO THE NORTH FACE
